Letter No.- 1072/187 स्था.प्र./21 **Date-** 15/09/2021

To
 Vishal Bohra, CEO
 Premium Petro Products
 1/3 Hathroi Market
 Ajmer Road, Jaipur - 302001

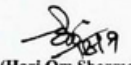

Sub.- Request for empanelment of Premium Petro Products for Bitumen and Bituminous products (all grades) in Uttarakhand.

Dear Sir
 This is with reference to your letter dated 28/07/2021 to Honorable PWD Minister, requesting approval as a supplier of Bitumen and Bituminous products (all grades) in Uttarakhand. Based on your submission, approval is given for supply of bituminous products (all grades) for a period of one year subject to fulfillment of the following conditions:

1. Raw material used for the production of bituminous product should be procured from a Public Sector Undertaking i.e., IOCL, Hindustan Petroleum, etc.
2. Each lot of material supplied must be accompanied with Mill Test Certificate (MTC) from NABL accredited laboratory.
3. The lot wise independent quality control tests shall be conducted on each supply lot. The quality of the bituminous product is to be ensured at site also.
4. The material supplied must be in accordance with the requirements of relevant IS/ IRC/ MORTH specifications.
5. This approval has been accorded on the condition that the Firm shall maintain quality and integrity of service intact. In case, any negative feedback and deterioration in quality of bituminous product is found, this approval will stand cancelled automatically.
6. The Department wholly reserves the right to revoke/ suspend the approval on the basis of review at any time. Approval can be withdrawn prematurely if the firm is found to be engaged in fraudulent practice.
7. The Department wholly reserves the right to revoke/ suspend the approval on the basis of the test conducted by the Department on the product at any time.
8. Above approval does not make the firm eligible for claiming right to take the work done through them which is subjected to their competitive stand amongst other qualifying specialized firm in the field.
9. The field staff shall have the liberty to witness conducting of test on samples in their presence.

11. The performance of the firm shall be monitored by field units and submitted to the approving authority before expiry of validity of approval. This approval can be renewed further on the basis of performance of the products as reported by concerned Field Engineers. The firm is required to submit a minimum 5 number of Performance Reports signed by the concerned PWD Assistant Engineer and Executive Engineer, to E-in-C's office at the time of renewal, failing which their case will not be considered for renewal.
12. The firm should submit test certificates of the entire product range manufactured by them, tested at any of the Indian Institute of Technology/ CRRl, once in every year as per latest version of ASTM-D2397, IRC:SP 53, IS: 8887, IS: 73, IS: 15462 or any other relevant standards.
13. The firm is required to submit details of sale/ supply of approved bituminous products to PWD Uttarakhand Contractors/ Divisions on six monthly basis to E-in-C's office as per format given below:

S. No.	Name of Product	Supply to PWD Contractors/ Divisions	Name of Work and Location	Date of Supply	Quantity Supplied	Amount (in Rs.)	Supply Order No.	Remarks
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)

characteristics

BITUMEN EMULSION RS-1, SS-1,SS2

VG-10

VG10 bitumen is the softest grade of viscosity bitumen. This type of bitumen is widely used for spraying applications and surface coating.

VG 10 bitumen means that your bitumen is also suitable for paving roads in a frigid climate instead of the old 80/100 penetration grade.

VG-30

This bitumen is primarily used for the construction of extra-heavy bitumen pavements that have to bear significant traffic loads.

Bitumen VG30 is the most widely used type of bitumen in road construction, insulation, building construction industries.

VG-40

VG40 bitumen is used in areas with high pressure from heavy traffic loads, **NHAI**, such as intersections, near toll booths, and truck parking lots.

Due to the high viscosity of this bitumen, it is more appropriate for improving resistance to shoving and other problems associated with higher temperatures and heavy traffic loads.

PRODUCT SPECIFICATIONS BITUMEN

Solubility in trichloroethylene, percent, Min	99	99	99
Softening Point, °C, Min	40	47	50
Viscosity Ratio at 60°C, Max	4	4	4
Ductility at 25°C, cm, Min	75	40	25

Each of these viscosity grade bitumen has different application according to the important factors such as **climate and traffic conditions.**

The table besides shows required limits of various grade of VG bitumen. ”

BITUMEN EMULSION

Bitumen Emulsions are a mixture of bitumen, water, and emulsifiers.

The coating of the bitumen particles by the emulsifier gives them an electrostatic charge. cationic emulsions are mainly used for the road sector while anionic emulsions are used for waterproofing in India.

The main grades of cationic emulsions are slow setting, medium setting and rapid setting.

SS1 MS1 RS1

CRUMB RUBBER MODIFIED BITUMEN

CRMB is a special type of bitumen whose properties have been improved by the addition of crumb rubber & special types of additives like hydrocarbon materials, resins, etc.

It is produced by incorporating crumb rubber and other additives compatible with bitumen.

CRMB is the ideal binder to overcome the concurrent problems of travelling, rutting, undulations, cracking, bleeding, shoving and pot-holing of bituminous pavement.

PRODUCT SPECIFICATIONS CRMB

Characteristics	CRMB 50	CRMB 55	CRMB 60
Penetration at 25°C, 0.1 mm, 100 g, 5 s.	< 70	< 60	< 50
Softening point (R&B), °C, Min	50	55	60
Flash point, COC, °C, Min	220	220	220
Elastic recovery of half thread in ductilimeter at 15 °C, percent, Min	50	50	50
Separation, difference in softening point (R&B), °C, Max	4	4	4
Viscosity at 150°C, Poise	1-3	2-6	3-9

POLYMER MODIFIED BITUMEN

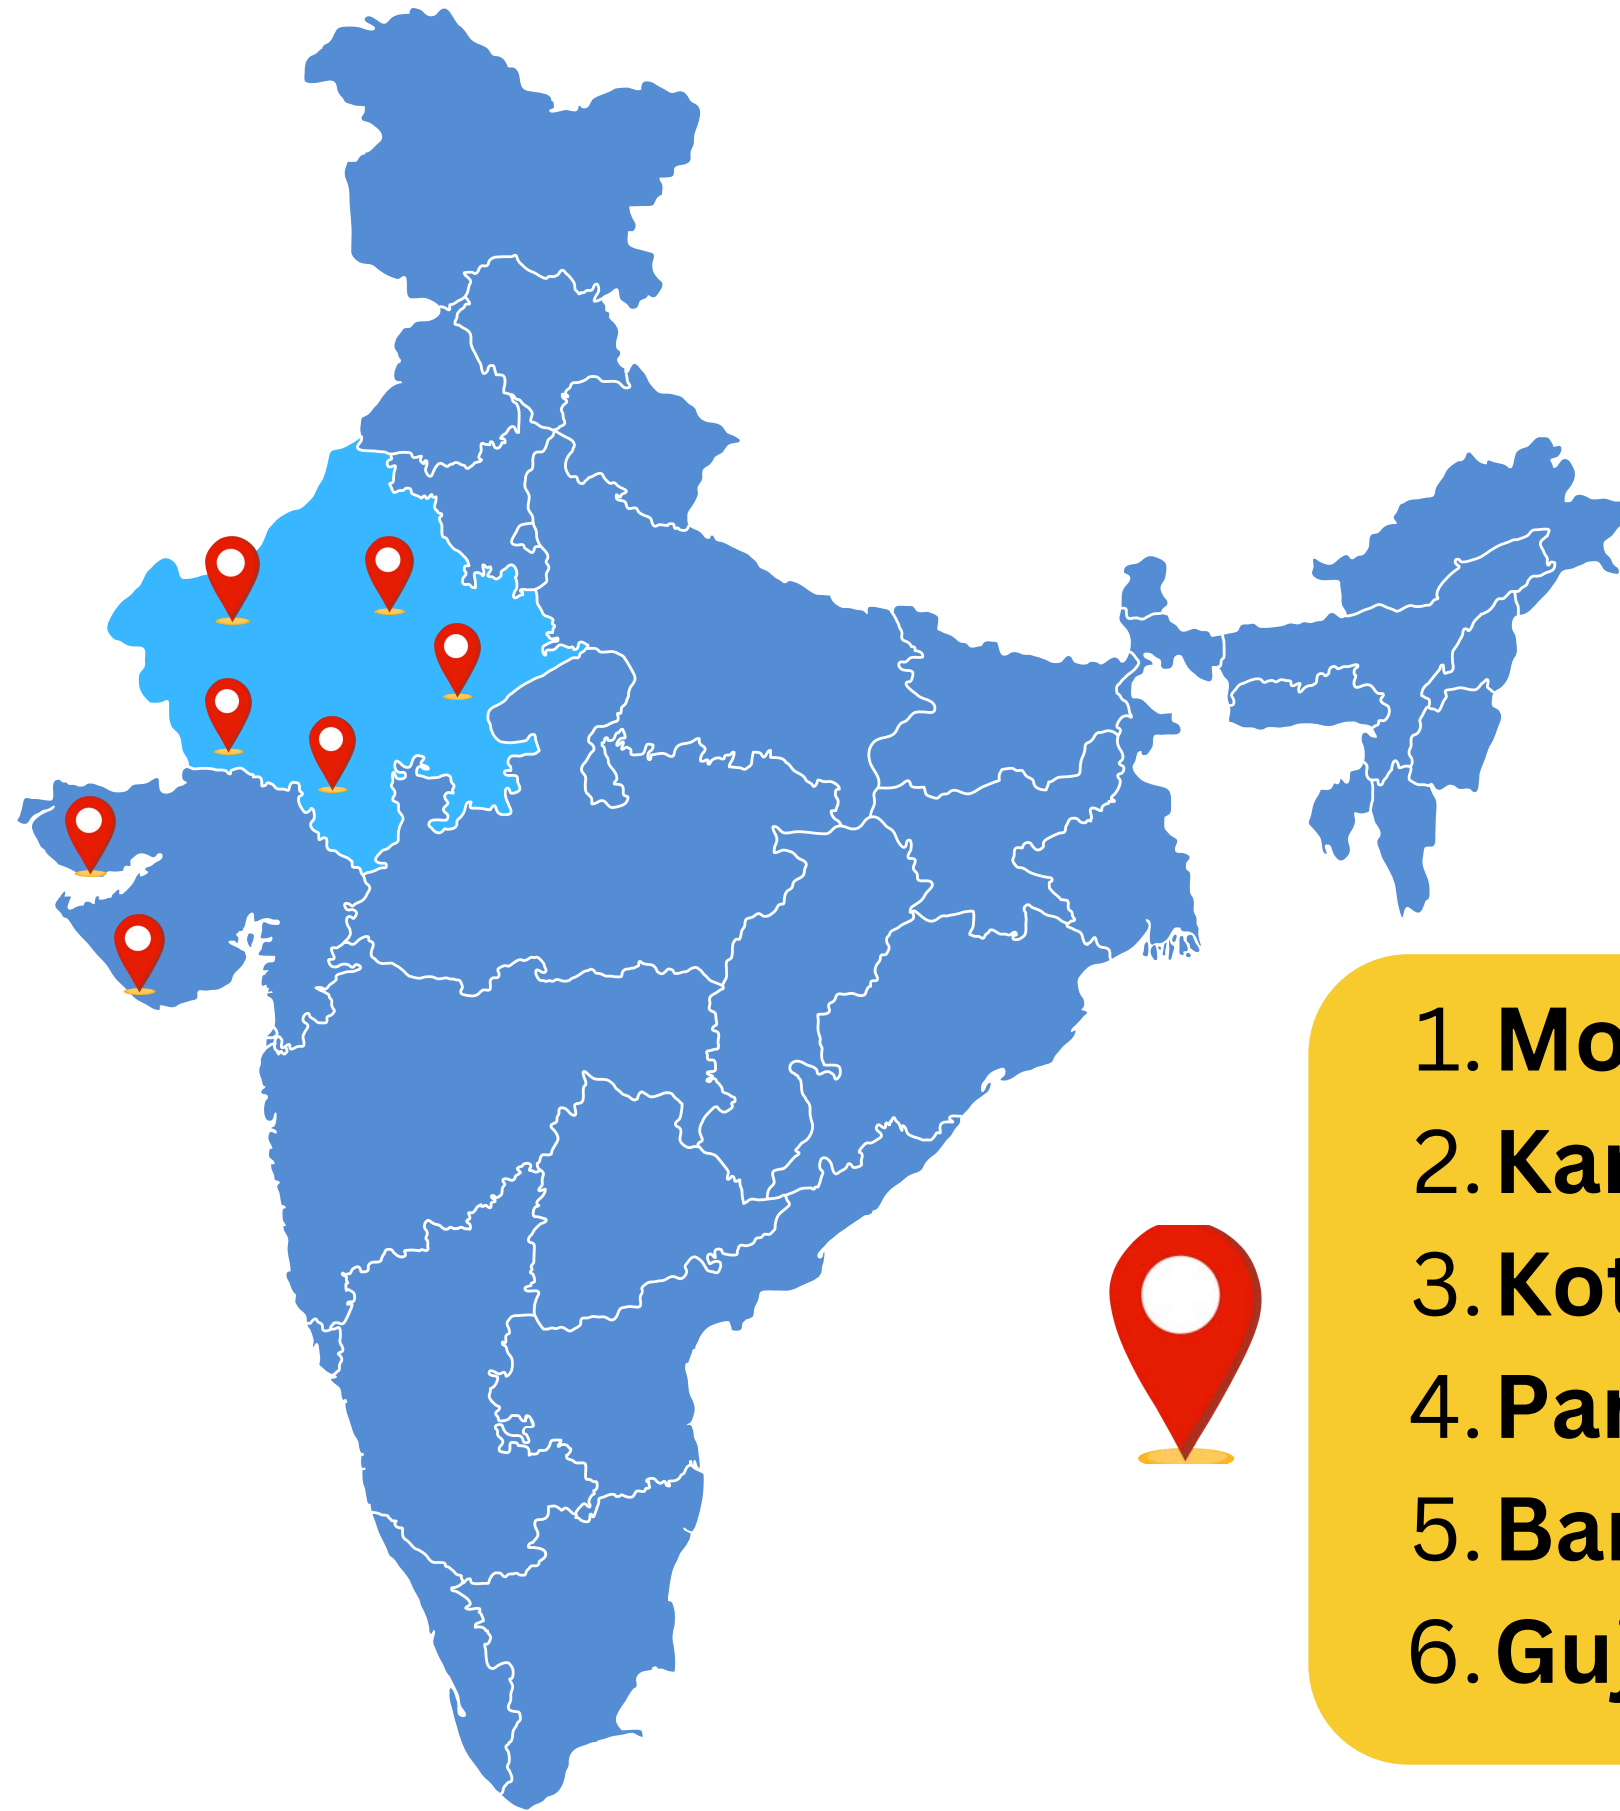

Polymer Modified Bitumen (PMB) is one of the specially designed and engineered bitumen grades that are used in making pavement, roads for heavy duty traffic and home roofing solutions to withstand extreme weather conditions.

PRODUCT SPECIFICATIONS **PMB**

Characteristics	PMB 120	PMB 70	PMB 40
Penetration at 25°C, 0.1 mm, 100 g, 5 s.	90 to 150	50 to 90	30 to 50
Softening point (R&B), °C, Min	50	55	60
FRAASS breaking point(1), °C, Max	-20	-16	-12
Flash point, COC, °C, Min	220	220	220
Elastic recovery of half thread in ductilimeter at 15 °C, percent, Min	70	70	70
Complex modulus as ($G^*/\sin \delta$ as Min 1.0 kPa at 10 rad/s, at temperature °C)	52	58	70
Separation, difference in softening point (R&B), °C, Max	3	3	3
Viscosity at 150°C, Poise	1-3	2-6	3-9

4. Our Office Letter no. TPFSITC/SEPL/GJ/SMC/2020/525 dated 27.02.2020

Dear Sir,

Reference to above cited subject, the submitted profile for VG-40 from the source named **Premium Petro Product 1-3, Hathroi Market Opp. Gopalbari, Ajmer Road, Jaipur 302001 (Raj)** has been reviewed in accordance with the codal provision of IS :73-2018 (Specification for paving bitumen, IS:334-1982 (Glossary of terms relating to Bitumen), IS:1201 to IS :1220 (Methods of testing for bituminous material) and the guidelines given in HP Bitumen Handbook and having joint factory visit to check in-house testing facilities at source and witness the required test as per the provision of IS:73-2018 in the setup of aforesaid agency and capacity of the plant to ascertain whether the aforesaid agency is capable to fulfill the requirement of various clients. and it had been observed that the submitted profile is meeting to the requirement of specification.

In continuation of the above and to expose the factual condition of manufacture for paving Bitumen VG-40 with name of Premium Petro, the enlarged process is hereunder.

The procured Bitumen VG-40 is imported from **Motive Bitumen Refinery llc. Office 308 UAE Enterprises Building, Dubai International Airport, Dubai UAE P.O Box 239744 Dubai UAE** in drums weighing 182+ kgs net weight having four numbers automatic decanting plants each of 240 drums per decanter with a total capacity of 400 MT production per day. The plant and premises follow standard procedures required for an ideal decanting and processing plant. The material imported is certified by SGS Dubai, who is one of the well-known certification companies in world.

The following Test carried out to check the quality of VG — 40 and the test results are in order to comply the required parameters.

S.N o.	Characteristics	Required	Results	Method of test
1	Penetration at 25° c, 0.1mm, 100 gm, 5 sec min.	35	40	IS-1203-1978
2	Softening point (R&B) 0 c. minimum	50	51	IS-1205-1978
3	Flash point (Cleveland open cup) 0 c. min.	220	240	IS-1448(P-69)

4	Kinematic viscosity at 135° C, est. min.	400	450	IS-1206(Part-3)
5	Solubility in trichloroethylene, percent, min.	99	99.2	IS-1216
6	Absolute Viscosity at 60 ° c.	3200-4800	3750	IS-1206
7	RTFOT residue - Viscosity ratio at 60 ° c. max.	4	1.7	IS-1206
8	RTFOT residue - Ductility at 25°c min	25	46	IS-1208

Hence in view of the above the lot of material procured for the supply on the project is approved subject to requisite confirmatory testing of the Bituminous Mix produced using this bitumen in required frequency. The lot wise supply is permitted on the project after prior providing manufacture test certificate from the source confirmed through test conducted by Premium Petro followed with testing of Bitumen and Bituminous Mix at project site laboratory in the presence of our representative.

Thanking you,

Sincerely yours,

 Independent Engineer

Dear Sir,

With reference to above cited subject, we would like to inform you that manufacturer profile and credentials of M/s. Premium Petro Products submitted by you have been reviewed and found satisfactory from our end. The source approval for the above VG 40 bitumen have been accorded subject to the following conditions.

- Bitumen shall be tested at any of the NABL approved laboratories or at any approved independent laboratory or Site Laboratory for each lot of bitumen supplied and necessary test report shall be furnished for acceptance criteria as per IS: 73: 2013 prior to use in permanent work, if any test pieces selected from lot fails, no re-testing shall be carried out and the lot shall be automatically rejected.
- Manufacturer's test certificate shall be submitted for each lot for review.
- All the bitumen supplied shall comply with the relevant Specification requirements of IS: 73: 2013 and MORT&H Specification 5th Revision.
- We reserve the right to reject the source without prior notice if it is found that the product proved to be unacceptable.
- The relevant MORT&H specification under Section 500 shall be followed.
- The procurement, storage and use of materials shall be in conformity with specifications and provisions of Contract Agreement.

Any deviation to the Contract agreement / Specification will be at the risk and cost of the EPC contractor.

Reference: -Your letter no. BGCC-RIL/2020/ 958 dated 3 December 2020 (received through electronic mail on 25 December 2020).

Sir

Concerning the subject cited above, it is to mention that via electronic mail through letter no. BGCC-RIL/2020/ 958 dated 3 December 2020, you have submitted M/s Premium Petro Products' company profile from where you wish to procure bitumen VG -30. **Submission of Hard Copy in original is still awaited.**

We have reviewed the submission made by you, and it seems to be satisfactory.

Before incorporating the bitumen, VG-30 procured from M/s Premium Petro Products please:-

- Ensure that each consignment procured at the site is tested in the presence of Senior Quality cum Material Engineer.
- Submit Manufacturing Test Certificate (MTC) for each consignment.
- Submit the invoice for each lot.
- Jointly collect samples of the bitumen VG -30 procured from source under question with Senior Quality cum Material Engineer and send the samples to a NABL accredited independent laboratory for testing as per applicable relevant codes and submit the results to the office of the undersigned for review.
- Ensure that the supplier seal every bitumen tanker, and the Authorized Representative of the consignee shall test its integrity with the representative of the Authority's Engineer before unloading at the site. If any tampering of the seal is found, then the consignee's representative shall not accept the tanker.

Dear Sir,

Please refer contract agreement and bid due date 17.01.2022 and MoRTH circular No. RW/NH-35072/05/2018-S&R(P&B) dated 24th August 2018. As per circular applicable on bid due date,

"(iii) The source of procurement of bitumen/ modified bitumen is always a concern from the point of view of homogeneity and quality. As such, the bitumen/ modified bitumen shall be procured from the refineries only."

Further to that please refer to the circular RW/NH-35072/05/2018- S&R (P&B) (E165688) dated 23rd August 2023,

"Considering the shortfall of domestic production vis-à-vis demand, use of imported bitumen may be accepted. Traceability of imported bitumen shall be ensured. Along with each tanker load, Manufacturer's Test Certificate (MTC) shall be provided. MTC will also have the details such as name of origin country, name of refinery, GPS coordinates of loading and unloading ports, adopted refining process etc."

AUTHORITY'S ENGINEER FOR SUPERVISION OF (i) Widening of Pachpadra-Bagundi section to 4- Lane of NH25 On EPC Mode and (ii) 4 lane divided carriageway of NH-15 (NewNH-68) to of NH-15 (New NH-68) Barmer Bypass of NH-15 (New NH-68) on EPC mode in the State of Rajasthan.

AE has gone through the circulars and come to the opinion that as per Contract and circular dated 24th August 2018, which was applicable on bid due date, bitumen shall be procured from the refineries only.

However, keeping in view of the shortfall of domestic production, MoRTH Circular dated 23rd August 2023 will be applicable and use of imported bitumen may be accepted.

Keeping in view of above circulars, Refinery's bitumen will be preferred on imported bitumen.

Keeping in view of above, preferred source of bitumen is from the IOCL, HPCL, BPCL MRPL, etc.

However, keeping in view of work interest, you may carry out the work with Premium Petro Product with due quality control tests as prescribed in the circular dated 23rd August 2023.

You are also advised to prefer sourcing of bitumen from the IOCL, HPCL, BPCL MRPL, etc.

Thanks & Regards

Yours Sincerely,
For MSV International Inc.
